A slip left in one of the pockets of rule is over us. the coat enabled him to find the manufacturer of the raw goods, who was one of his customers. The retail merchant tailor bought the woollen cloth for \$12.60, which represented a reasonable profit for the grower, importer, sales house, manufacturer, but no midhe was so wrong on the events of dieman's profit, which probably would not have been excessive. The cutter up and other charges were eliminated by the direct purchase from the mill

> The cost of the lining, buttons other fixings must be added to \$13.60. The style required no extras. The total costs up to the time the coat was on the sales floor might have been \$35, and were probably much less.

The wool dealer made about 12 per cent. The manufacturer of the yard goods gave his profit to the purchaser of the coat as about 10 per cent. The garment was pure wool of a good grade.
